

**The Burnsville business, Antiques Minnesota, revolves around the concept of reuse; all of the antiques in the store are sold to new owners instead of going to the landfill. They also avoid waste by using newspaper and bags for purchases and use recycled boxes for shipping.**

Awards for Reduction and Recycling Of Waste

Dakota Valley Recycling, a partnership between the cities of Apple Valley, Burnsville and Eagan, bring you ARROW - Awards for Reduction and Recycling of Waste. This free program is designed to recognize local businesses for their current environmentally preferable choices in managing resources. If your business has current practices including recycling, buying recycled, selling recycled, reducing and/or reusing, then ARROW is for you.

**The Eagan Community Center closes the loop of recycling by purchasing paper towels and garbage liners made from recycled content materials and reusing the liners when possible. The Community Center also uses light fixture and public water sensors to conserve energy and water consumption.**
